### Investigations with Numicon\* £32.80

ISBN: 978-0-95-539496-6  
Investigations with Numicon teaching book contains ten open-open investigation with a low threshold and high ceiling.

All the activities start with the use of Numicon Shapes and number rods to allow the majority of pupils to be involved at a basic level. Gifted and Talented children can develop their skills by taking the investigations to higher levels. By using the Shapes and rods the investigations are dynamic, helping children to recognise that numbers form a high organised system full of many patterns. All the investigations can be taken to higher levels of KS2 and some to Level 5. The investigations give children opportunities to use and apply their number understanding and to extend their mathematical thinking, for conjecture, trial and improvement, logical thinking about numbers and careful mathematical deduction. Children will also see the advantage of setting out their work systematically to reveal emerging patterns and demonstrate their thinking.

If schools already have Numicon resources available then these can be used to work with Investigations with Numicon. If this is not the case, we recommend the following materials are purchased alongside:

## SEN AND INTERVENTION

### Closing the Gap with Numicon

Closing the Gap with Numicon has been designed specifically for pupils with SEN or those who are having difficulty in basic number understanding. The teaching file offers solutions to pupils' difficulties to support teachers in their assessment, planning and teaching. The programme of small-step activities is suitable for pupils working at P-levels to NC level 1 and follows the typical acquisition of early number skills, addressing the acquisition of numerosity (awareness of the number of objects in a set), counting, the ability to recognise and exploit pattern, and early computation. Non-age specific.

### Group Kit £212.00+VAT

## HOMEWORK

### Homework Activities Intervention Resource CD £68.00+VAT

ISBN: 978-0-19-848705-0

The Numicon Homework Activities are designed to enable children to practise at home what they are learning in school.

The playful activities and games develop skills in the following areas: counting, adding and subtracting facts, place value and recognition of the inverse relationship between addition and subtracting. They enable parents to get involved without actually 'teaching' their children.

The activities are simple for schools to administer and come with comprehensive guidance for teachers. They are supplied on a CD for teachers to print so children can take them home. Each game and activity comes with clear and easy to follow instructions for parents. Schools should also purchase 'Maths Bags'\*. These contain the resources needed to complete the games and activities. It is recommended that each child has their own Maths Bag.

**On the CD** • 43 activities linked to what the children are learning in school • Comprehensive advice for teachers • Feedback sheets to be completed by the children and parents • Record sheets for teachers and explanatory information for parents including a pdf presentation that schools can use to introduce parents to the resources.

It is recommended that each child has their own Maths Bag.
